PASSENGER LUGGAGE SPACE **UPGRADE**

The new retrofit doors for classic cabin interior of A318, A319, A320, A321 aircraft to increase overhead baggage capacity. For other aircraft types available on request.

PASSENGER LUGGAGE SPACE UPGRADE

BENEFITS

- > Allows 5 instead of 3 roller bags per 4 frame overhead luggage bin
- > More space for luggage means faster boarding time and save cost caused by boarding delays
- > Fast and easy retrofit overnight (7-9 hours)
- > Aircraft weight reduction up to 20 kg
- > Modern appearance of main cabin due to new doors and latches
- > Bin décor and color, various latch designs and colors at your choice for customization and individuality (e.g. incl. airline logo)
- > Robust hinges with quick release system for easily remove of doors prior to ceiling removal
- > FACC onsite installation training
