

Design Engineer for Container Construction (m/f/d)

FACC develops systems and assemblies for the aerospace industry and produces high-quality fiber composite components for this purpose. Our customers include well-known aircraft manufacturers such as Boeing, Airbus and Bombardier Aerospace. We are looking for interested and committed applicants.

Your responsibilities:

- ✈ Development and construction of transport containers
- ✈ Preparation of drawings, parts lists and specifications including definition of acceptance criteria
- ✈ Technical coordination for internal and external production
- ✈ Continuous coordination with internal and external logistics partners
- ✈ Definition and adaptation of standards for container production

Your profile:

- ✈ Technical education (FH/HTL mechanical engineering, automation technology, apprenticeship with further education)
- ✈ At least 2 years professional experience in tool, mould and fixture construction
- ✈ Sound knowledge of sheet metal processing
- ✈ Experience in the use of a 3d CAD program
- ✈ MS-Office knowledge
- ✈ Good knowledge of German

We offer:

- ✈ Highly flexible work times
- ✈ Happy Birthday: a free day for your birthday
- ✈ Company canteen as well as lunch allowance
- ✈ Strong and steadily growing company
- ✈ Diverse and international work environment
- ✈ Various regular further education and training

If you want to make a difference in your day-to-day work as well as take part in our success, then we are looking forward to your meaningful job application, preferably by online form.

According to the GBG, we are referring to ladies, gentlemen and divers.

The minimum collective agreement salary (KV Holverarbeitende Industrie) for this position is EUR 28.985,74 annually. The actual monthly salary will depend on your qualification und experience. Therefore, together with you, we would like to adjust it accordingly.
