

## FACC with further revenue growth in the first quarter of 2025

- *Revenue up +14.1% year-on-year to EUR 231 million*
- *EBIT of EUR 4.3 million in the first quarter of 2025 (same period in 2024: EUR 9.9 million)*
- *Workforce grows to 3,896 employees (end of 2024: 3,850 FTE)*

In the first quarter of 2025, FACC continued to benefit from the growth of the aviation industry and the high demand for modern passenger aircraft and recorded revenue growth of +14% to EUR 231.0 million (same period in 2024: EUR 202.4 million). Ongoing distortions in international supply chains and, above all, high material and personnel costs weighed on the operating result of EUR 4.3 million (same period in 2024: EUR 9.9 million). The number of employees grew by +46 FTE in the first quarter.

### **Cost reduction and efficiency program in implementation**

The distortions in the global supply chain environment remain and continue to cause increased pressure at the material price level as well as in inventory management. In particular, the discussion about the introduction of tariffs in the aviation industry poses new challenges for the industry. FACC's cost-cutting and efficiency program will therefore continue to be implemented at full speed and will lead to a sustainable increase in earnings by the end of 2026. The funds seized in China following the fake president incident in the amount of EUR 10.8 million, which were transferred back to FACC by the Republic of Austria at the end of March 2025, were booked as receivables at FACC and their receipt is therefore not reflected in earnings.

### **Outlook**

The outlook for the 2025 financial year remains unchanged. For the 2025 financial year, the management of FACC expects the growth trajectory to continue and a projected revenue increase of

5 - 15%. The operating result will continue to improve due to expected scale effects as well as effects from FACC's efficiency enhancement program currently being implemented.

## **About FACC**

FACC is a worldwide leading aerospace company in design, development and production of aerospace technologies and advanced aircraft lightweight systems. Being the technology partner of all major manufacturers, FACC works together with its customers on developing solutions for the mobility of the future. Every second, there is an aircraft taking off with FACC technology on board. In the fiscal year 2024, FACC achieved EUR 884,5 million in revenues. More than 3,800 people from +50 nations are employed at 15 international locations worldwide. The company is listed on the Vienna Stock Exchange.
